---

### PROFILE SUMMARY

Recent graduate with comprehensive skills in Full Stack .NET development, Angular.ts, and diverse web technologies. Proficient in HTML/CSS, JavaScript, React.js, and Bootstrap, with hands-on experience in ASP.NET Core MVC and Web API development. Demonstrated problem-solving abilities and a strong commitment to learning and growth.

---

### TECHNICAL SKILL

C# HTML/CSS Bootstrap JavaScript/TS ASP.NET Core MVC ASP.NET Core WEB API Oracle  
Entity FrameWork MS SQL Server LINQ SQL RESTFull API Node.js Express.js Github

---

### WORK EXPERIENCE

#### Full Stack Web Developer Trainee at Tahaluf Al Emarat Technical Solutions July 2023 –Present

- Developed C# applications using OOP principles to ensure code quality and maintainability.
- Designed and optimized databases from scratch using Oracle SQL Developer, implementing PL/SQL for efficient data management.
- Crafted visually appealing web interfaces using HTML, CSS, JavaScript, Bootstrap, and the Angular framework.
- Designed and implemented dynamic .NET Core MVC applications, prioritizing user experience and interaction.
- Independently engineered a custom .NET Core Web API server, establishing seamless integration with Angular for real-time updates and enhanced user interfaces.

#### Full Stack Developer Trainee at The Hope International Feb 2023 –May 2023

- Developed dynamic .NET Core MVC applications, utilizing HTML, CSS, JavaScript, and Bootstrap, resulting in visually engaging and responsive front-end interfaces.
- Implemented robust back-end functionality using the Entity Framework, ensuring efficient data management and seamless integration with the front-end components.
- Designed and implemented databases using Microsoft SQL Server, applying principles of data modeling, optimization, and scalability to ensure data integrity and performance.

---

### EDUCATION

#### Jordan University of Science and Technology

Sep 2019 – July 2023

Bachelor of Software Engineering GPA of 3.3 out of 4 (Very Good).

## PROJECTS

### Project: Pet-Care (Graduation Project)

**Role:** Full Stack Web Developer (MERN Stack)    [Link](#)

- Developed a Pet-Care application using HTML, CSS, JavaScript, React for the front-end, and Node.js with Express for the back-end.
- Designed and implemented MongoDB for the database.
- Integrated Stripe API for e-commerce, Google Maps API for clinic locations, and created admin panels to manage inventory, blogs, user orders, and clinic locations.

### Project: School Registration System

**Role:** Full Stack Web Developer (.NET Core MVC)    [Link](#)

- Spearheaded the creation of a comprehensive school management system, orchestrating the development of a user-friendly front-end and a robust back-end using HTML, CSS, JavaScript, Bootstrap, Entity Framework in C# .NET MVC, and Microsoft SQL Server.
- Implemented pivotal features including school registration, employee/student management, and seamless CRUD operations, optimizing data integrity and workflow efficiency.

### Project: SheHeStore

**Role:** Full Stack Web Developer (.NET Core MVC)    [Link](#)

- Developed an e-commerce website using .NET Core MVC with an Oracle database, catering to electronics sales including laptops, phones, games, PCs, and various accessories.
- Integrated a well-designed .NET Core MVC architecture to ensure seamless functionality and user-friendly navigation for optimal customer experience in the e-commerce platform.

### Project: GamifyLearnHub

**Role:** Full Stack Web Developer (.NET Core WEP API & Angular )    [Link](#)

- Led the creation of a sophisticated Learning Management System (LMS) using Oracle database procedures and packages, employing .NET Core Web API with Onion Architecture for a robust backend.
- Developed the user interface with Angular.ts, crafting an inclusive platform for courses, teacher management, and gamification. Implemented gamified learning experiences, allowing users to earn points based on their engagement and progress within the system.
