---

## PROFILE SUMMARY

Experienced software engineer specializing in full-stack web development. Proficient in modern tools to create user-friendly web applications, with expertise in HTML/CSS, JS, Bootstrap, React.js, and Angular.ts for front-end development. Extensive experience as a full stack MERN developer, ASP.NET Core MVC developer, and ASP.NET Web API developer. Strong understanding of project requirements and a year and a half of experience as a fresh graduate.

---

## TECHNICAL SKILL

C# HTML/CSS Bootstrap JavaScript React.js Angular.TS ASP.NET MVC ASP.NET Core WEB API  
Entity FrameWork MS SQL Server OracleDB LINQ SQL RESTFull API Node.js Express.js GIT

---

## WORK EXPERIENCE

**Full Stack Web Developer Trainee at Tahaluf Al Emarat Technical Solutions** July 2023 –Present

- Proficiently developed C# applications using OOP principles, ensuring code quality and maintainability.
- Designed and implemented well-structured databases, optimizing query performance and data integrity.
- Created visually appealing and responsive web interfaces using HTML, CSS, JS, and Bootstrap, also Angular framework.
- Constructed dynamic .NET Core MVC applications, following MVC architecture and enhancing user experiences.
- Integrated Angular with .NET Core Web API, enabling real-time data updates and interactive user interfaces.

**Full Stack Developer Trainee at The Hope International** Feb 2023 –May 2023

- Developed dynamic .NET Core MVC applications, utilizing HTML, CSS, JavaScript, and Bootstrap, resulting in visually engaging and responsive front-end interfaces.
- Implemented robust back-end functionality using the Entity Framework, ensuring efficient data management and seamless integration with the front-end components.
- Designed and implemented databases using Microsoft SQL Server, applying principles of data modeling, optimization, and scalability to ensure data integrity and performance.

---

## EDUCATION

**Jordan University of Science and Technology**

Sep 2019 – July 2023

Bachelor of Software Engineering GPA of 3.3 out of 4 (Very Good).

## PROJECTS

### Project: Pet-Care (Graduation Project)

**Role:** Full Stack Web Developer (MERN Stack)    [Link](#)

- Developed the front-end using HTML, CSS, JavaScript, and the React framework.
- Built the back-end server using Node.js with Express.
- Designed and implemented the database using MongoDB.
- Created a Pet-Care application that enables users to share adoption offers posts.
- Implemented features such as user comments and post likes for adoption offers.
- Integrated the Stripe API to provide e-commerce functionality for pet owners to purchase goods for their pets.
- Added a pets blog section to provide information on pets and their breeds.
- Utilized the Google Maps API to enable admins to enter longitude and latitude coordinates from the admin panel, displaying clinic locations on the blog section's map.
- Developed an admin panel to manage the pet store inventory, pets blogs, user orders, and clinic locations for the pets.

### Project: School Registration System

**Role:** Full Stack Web Developer (.NET Core MVC)    [Link](#)

- Developed the front-end using HTML, CSS, JavaScript, and Bootstrap to create a user-friendly and responsive interface.
- Implemented the back-end using the Entity Framework in C# .NET MVC, ensuring efficient data management and smooth integration between the front-end and back-end components
- Designed and developed the database using Microsoft SQL Server, ensuring data integrity and optimal performance.
- Built a school registration feature that allows students to register for specific courses, enabling efficient management of student enrollment.
- Implemented functionality to add new employees and students to the system, facilitating efficient employee management.
- Provided the ability to edit and delete employee and student records, ensuring data accuracy and flexibility.
- Implemented CRUD (Create, Read, Update, Delete) operations on the system, allowing for seamless data manipulation.
- Utilized the scaffold command to generate code snippets and accelerate development tasks, improving productivity and code consistency.
